"A Step towards a Bright Future"

Dear Sir/Madam

I'm writing to offer a solar quotation for Lesol Solar LLP. We specialise in custom solar solutions, expertly designed to save money and reduce your environmental footprint. Let's discuss your needs and explore how solar can benefit.

Expertise:

We have a proven track record since 2015 of successfully implementing solar projects for businesses across various industries & have expert technicians for ensuring top-notch service and system performance.

Customised:

We understand that every business is unique. We will work closely with you to assess your energy needs, site conditions, and budget to design a solar energy system that aligns with your goals and requirements.

Cost Savings:

Solar energy can significantly reduce your electricity bills and provide a stable source of energy for your operations. We will provide a detailed cost analysis, including potential incentives and financing options, to demonstrate the financial benefits of solar.

Responsibility:

By switching to solar energy, you will reduce your carbon footprint and demonstrate a commitment to sustainability, which can enhance your reputation and appeal to eco-conscious customers.

GRAND TOTAL	Rs.17,79,000/

Who We are

HAVELLS INDIA LIMITED, SP 1A rated MNRE Channel Partner and a leading US\$ 1.3 billion Fast Moving Electrical Goods (FMEG) Company. Today, Havells has a market capitalisation over US\$ 10 bn and is India's major power distribution equipment manufacturer with a strong global presence. Havells operations includes thirteen state-of-the-art manufacturing plants in India located at Haridwar, Baddi, Noida, Sahibabad, Faridabad, Alwar, Neemrana & Ghiloth; manufacturing globally acclaimed products, synonymous with excellence and precision in the electrical industry.

The company with a strong dealer & distribution network could expand its Solar business deep into metro & non metro markets within a short period of time .With a good product spread & strong portfolio we are among the top 10 Solar Inverter company in India. We have sold more than 300 MW of On Grid Solar String inverters since launch. The wide range of inverters from 1 kW to 250 kW serves to requirement of each category of customer. Today Havells Solar is considered a preferred brand in both residential & commercial space. We have the privilege of executing some of the world class solar rooftop projects. More than 25000 roofs have Havells Solar Rooftop Solution with IEC Certified Havells Solar Panel . The installation ranges from 1 kW to 4 MW on a single roof.

We have a strong service network spread across 700 districts in the country. Each of the state has more than one warehouse to deliver stocks on time & handle service requirements within the required SLA. Havells is one of the largest solar DC/AC cable manufacturers in India. The cables are being manufactured at Alwar, the largest integrated cable factory. More than 90% of the products are being manufactured in house.

OUR PROJECTS

Havells is a One Stop Solution provider. From designing to execution Havells is proud to associate with some of the marque solar projects in the country. Havells is one of the top 5 EPC in the country. With a strong team of technocrats and deep technical knowledge, Havells team have commissioned both ground mount & rooftop systems.

WHAT OUR SERVICES

End-to-End Solar Rooftop Solution

Havells is one of the leading turnkey EPC players in the country. With a team of over 70 Professionals across the country, design centre at Noida & Hyderabad and R&D at Bangalore the company offers end-to-end solution for On Grid Solar Rooftop projects. Havells offers integrated solution to its customers wherein the products are being designed, manufactured, installed & serviced by the inhouse team of Havells. A one stop solution from a single window, in depth technical know how & capability of executing long term contract makes Havells as one of the preferred brand for customer.

Why Havells Solar ?

- One Stop Solution Provider-Design / Engineering / Manufacturing / Sales / Installation / Services
- High Credit Rating (AAA) - Financially stable company to honour long term warranties.
- Customer Centric Company - Operation in India since 1971
- Engineering Capability - A SP1A Rated Renewable Energy Company
- Highly Engineered Havells Inverter-10 Years Warranty. Other key components Panels / ACDB / DCDB / Cables / Switchgear / SPDs manufactured in house.
- Wide Reach for Sales & Service-Operation through 44 Branches across the country. 84 Numbers of authorised service centres. Warehouses in each state for inventory management.

ENVIRO THREE PHASE GTi

50 KT | 60 KT

- Models - Enviro GTi 50 KT- 50 kW & 60 KT- 60 kW
- Three Phase THREE MPPT suitable for Commercial application
- High efficiency inverter up to 98.6 %
- Built in DC Switch, DC SPD Type II
- 4 inch LCD display for generation data
- BIS and IEC Certified
- WiFi / GPRS Data logger, RS485, RRCR Port
- SD card for 25 years data storage locally
- Anti-Reverse Power control (APRC) – Optional

IS 16221 (PART 2):2015/IEC 62109-2 :2011
IS 16169 :2014/IEC 62116 :2008

R-41165239
www.bis.gov.in

ENVIRO SINGLE & THREE PHASE GTi

80 KT | 100 KT

- Models- Enviro GTi 80 K - 80 kW & 100 KT- 100 kW
- Three Phase, 8 to 10 MPPTs
- High efficiency inverter up to 98.7 %
- Built in DC Switch,
- Inbuilt DC SPD Type II, AC SPD Type II
- WiFi / GPRS Data logger, RS485
- IEC Certified

IS 16221 (PART 2):2015/IEC 62109-2 :2011
IS 16169 :2014/IEC 62116 :2008

DC Distribution box

- IP65 Rated Polycarbonate box
- Type II DC Surge Protection device
- DC Fuses for positive and negative inputs
- DC Fuse of 20 A rating used
- Suitable for 1000 V DC application

AC Distribution box

- Metal Enclosure powder coated
- Type I+ II Surge Protection device
- Incomer MCB / MCCB as per required capacity
- Outgoing MCB / MCCB / ACB as per required capacity
- Multifunction meter with CTs (optional)

Solar PV Panel

- High-performance high-efficiency Poly / MONO PERC Modules are designed with 72 cells / 144 half-cut cell configuration.
- 335 Wp and 535 Wp & Above
- 10 years of product warranty
- 25 Years of linear power output warranty
- Extreme weather resilience
- Windspeed - 2400 Pa, Snowload - 5400 Pa
- Highly reliable anti-reflective coated glass
- 1500 Vdc
- PID resistant

On Grid Solar Rooftop Systems

ABOUT LESOL SOLAR LLP

LESOL is an established name in the renewable energy solutions Since 2015 Provides world class service in catering the needs of customers. We work with universally popular brands like Havells, and are the best in the field with respect to the production of Solar on Grid, Off Grid, Solar Water Heaters, Inverters, Tubular Batteries and Security Solutions. We work to make the earth the best place to live on by reducing all sorts of negativities from the usage of conventional power generating systems. In addition to these,

LESOL specialises in Off-Grid, On-Grid & Hybrid solar electric design and installation, offering the latest technology and state of the art equipment, from renowned manufacturers around the globe from which you could choose from; for all your commercial, Industrial and residential use.

LESOL is committed to each customer, to quality installations, and to making “going solar” an effortless experience. We strive for “win-win” scenarios with both our customers and employees. Since our business is built On happy customers who are eager to refer their friends and family, it's in our best interest to provide exceptional customer satisfaction and service in every aspect of installation.

LESOL IS AN AUTHORISED CHANNEL PARTNER HAVELLS INDIA LTD (SOLAR DIVISION)

LESOL IS AN AUTHORISED EMPANELED VENDOR (MNRE) GOVT OF INDIA

MAIN FACTORS THAT MAY AFFECT POWER GENERATION

Factor/Item	Description
Shading / Shadow	Three types of shading losses may affect the PV energy yield: Horizon shading, shading between rows of modules and near shading due to trees and buildings
Incident Angle	The incidence angle loss accounts for the losses in radiation penetrating the front glass of the PV modules due to angles of incidence other than perpendicular.
Low Irradiance	The conversion efficiency of a PV module reduces at low light intensities.
Module Mismatch Soiling	Module Mismatch Losses due to “mismatch” due to the fact that the real modules in an array Soiling Losses due to dust and bird dropping; soiling the module.
DC/AC Wiring Losses	Electrical resistance in wires between the powers available at the modules and at the terminals of the array may lead to comic losses.
Inverter Performance	Inverters convert from DC into AC with a certain specified maximum efficiency. Depending on the inverter load, they will not always operate at maximum / same efficiency
Grid Availability	The ability of a PV power plant to export power is dependent on the availability of the distribution or transmission network. Unless detailed

ASSUMPTION

- Bill of Material & Proposed Capacity may vary from actual site condition and after detailed engineering. Module layout is proposed assuming the standard mounting practice on a roof surface (south face).
- Peak sunshine availability of 5 hours - average.
- It is assumed that sufficient shadow free areas will be available for installation of modules. In case of restriction due to already installed equipment, other roof (as available at site) may have to be used keeping minimum impact on generation
- Making the site ready and clearing the terrace / roof of any unwanted items is not included in scope of work. Necessary support will be extended to our Installation team for taking material inside the premises and also to the rooftop. The same has to be kept at a proper and secure place till completion of Installation.
- Load bearing capacity of the roof should be adequate to carry the load of the MMS system considering the wind load of the zone and the roof structure implementation for mounting the solar modules is under customer scope of work.
- Application and processing fees of the Department along with any other incidental charges is in Customer's scope
- **KSEB Feasibility, Registration amount Per kw 1000 +18% Gst (80% Refundable from KSEB & Electrical Inspectorate Licensing fees is under Customer Scope**
- Water & Electricity required for construction of solar power plant shall be in Owner's scope.
- Pare feeder for termination of solar ACDB to Owner's LT Panel will be in Owner's scope.
- Periodic cleaning of PV modules shall be completely under the scope of the customer.

WARRANTY CONDITIONS

- Solar PV Module 10-year product warranty and 25 years linear warranty from the date of supply in accordance with the warranty conditions of pv module manufacturers.
- On Grid Inverters carry 10 years warranty from the date of supply in accordance with the warranty conditions of the inverter manufacturers.
- Electric installation works such as interconnection of strings, connection of string combiner boxes, AC/DC Cables will carry warranty for 5 year from the date of commissioning
- Warranty for the structural safety and stability of the mounting system will be covered for a period of 5 years from the date of commissioning
- Performance warranty for a period of 5 years (can be accessed on-call basis) Parts and components, which are repaired or replaced during such period, are warranted for the original warranty period only and will not carry any extended warranty.

This warranty shall not apply to defects resulting from:

- Wilful damage or negligence, normal wear and tear
- Installation and /or maintenance by Customer or a third party
- Misuse or abuse of Equipment
- Modifications or alterations made by Customer or a third party without consent
